

Ethical and Legal Considerations – “Give the Duck a Qwacker”

Development and Ethical Considerations:-

- The game is safe and suitable for all players.
- The game does not include any violent, offensive, or harmful content.
- It is designed to be educational and fun.
- The gameplay gives positive reinforcement by rewarding correct answers and providing clear feedback.

Testing and Quality:-

- The game meets minimum standards of reliability and usability.
- It ensures that animations such as the duck movement, pond jump, and collision with crackers behave as expected.
- The timer correctly triggers game over conditions.
- The user interface responds appropriately to player input.
- Any bugs discovered during testing, such as multiple win screens or floating ducks, were identified, corrected, and retested to ensure proper functionality.

Legal Responsibilities:-

- The game complies with data protection and copyright.
- Player names entered for the leaderboard are stored locally in a CSV file and are only used for game functionality.
- No personal information beyond the player’s chosen name is collected, shared, or stored externally, ensuring compliance with data protection principles similar to GDPR.
- All images, sounds, and other assets used in the game are original creations or from freely available resources, ensuring no copyright infringement.

Finally, all work included in this project is my own.
